Contact: +91 9975 355 387

SUMMARY OF QUALIFICATIONS

- Dynamics 365 CRM Expert: 14 years of hands-on experience designing, implementing, and optimizing complex CRM solutions for enterprise-level organizations.
- Technical Depth: In-depth knowledge of Dynamics 365 architecture, customization, data models, security, and integrations. Proven ability to architect scalable solutions.
- Cloud Savvy: Strong understanding of Azure cloud services and infrastructure to maximize the performance and security of Dynamics 365 CRM deployments.
- In-depth knowledge of core Dynamics 365 modules (Sales, Customer Service, Marketing, etc.), customization capabilities, integration patterns (Power Automate, Power Apps, and cloud deployment best practices).
- Solution Delivery: Proven track record of leading project teams, managing client expectations, and delivering high-quality CRM solutions on time and within budget.
- Client-Focused: Excellent communication and interpersonal skills, adept at building strong relationships with stakeholders and ensuring their needs are met.
- Problem Solver: Highly analytical with a knack for identifying and resolving complex technical and business challenges.
- Continuous Learner: Passionate about staying up-to-date with the latest Dynamics 365 CRM features, best practices, and industry trends.
- Leadership: Experienced in mentoring and coaching team members, fostering a collaborative environment, and driving continuous improvement.
- Certified: Holds relevant Microsoft certifications in Dynamics 365 CRM and related technologies.
- Industry Experience: Finance, healthcare, retail, manufacturing, retail, real estate.
- Awards/Recognition: Best Employee Award in NeoSoft (2012); Ace Award in Hexaware (2014); DNA Awards – Deep Thinking in Sonata Software (2024).

TECHNICAL SKILLS:

- Deep understanding of Dynamics 365 CRM: In-depth knowledge of the platform's architecture, customization capabilities, data model, security model, and integration options.
- Microsoft Power Platform expertise: Proficiency in Power Apps, Power Automate, and Power BI to build custom solutions, automate processes, and create insightful reports.
- Cloud technologies: Familiarity with Azure cloud services and infrastructure to leverage the full potential of Dynamics 365 CRM in a cloud environment.
- Development experience: Experience with .NET, C#, JavaScript, and other relevant programming languages for building custom extensions and integrations.
- Data management: Knowledge of data modelling, migration, integration, and cleansing techniques to ensure data quality and consistency.
- Security and compliance: Understanding of security best practices, authentication mechanisms, and compliance requirements to protect sensitive customer data.

FUNCTIONAL SKILLS:

- CRM domain expertise: Extensive knowledge of CRM processes, best practices, and industry trends to design solutions that meet business requirements.
- Business analysis: Ability to analyze business processes, identify pain points, and translate requirements into functional specifications.
- Solution design: Expertise in designing scalable, flexible, and user-friendly CRM solutions that align with the organization's goals.
- Process automation: Proficiency in automating repetitive tasks and workflows to improve efficiency and productivity.
- Data analytics: Ability to leverage data insights to identify trends, optimize performance, and drive informed decision-making.

INTEGRATION SKILLS:

- OOTB Integrations: Outlook, Excel, Teams, LinkedIn, SharePoint
- Data Integrations: Connect Dynamics 365 CRM with your ERP systems to streamline data flow between sales, inventory, financials, and operations. Integrate Dynamics 365 CE with Dynamics 365 F&O, SAP, Oracle, Salesforce, NetSuite
- Marketing Automation Systems: Integrate Dynamics 365 CE with platforms to sync lead data, nurture campaign, and track it. Integrate Dynamics 365 CE with HubSpot, Marketo, Mailchimp.
- Communication Platform, Telephony (CTI): Integrate Dynamics 365 with phone systems to enable click-to-call, call logging, and screen pops directly with CRM. Integrate D365 CE with Cisco, Twilio, Genesys.
- Integration D365 CE with third parties APIs: Power Automate, Azure Service Bus, Logic Apps, Web Hooks, Synapse Link, Data Factory, Virtual Table
- Real-time Integration with Apigee Google Cloud, Informatica Cloud, and other third party's
- Batch Processing (File transfer, data transfer) with Informatica Cloud, Kingsway Soft.

SOFT SKILLS:

- Communication: Excellent written and verbal communication skills to effectively interact with stakeholders, gather requirements, and present solutions.
- Collaboration: Ability to work effectively with cross-functional teams, including developers, business analysts, and project managers.
- Problem-solving: Strong analytical and problem-solving skills to identify and resolve complex technical and functional issues.
- Leadership: Ability to lead and mentor technical teams, provide guidance, and ensure project success.
- Client management: Experience in managing client expectations, building relationships, and delivering successful projects.

ADDITIONAL SKILLS:

- Project management: Experience in managing CRM implementation projects, from planning to deployment and post-implementation support.
- Change management: Knowledge of change management principles to ensure smooth adoption of new CRM solutions.
- Pre-sales support: Ability to assist in pre-sales activities, such as demos, presentations, and proposal preparation.

CERTIFICATIONS:

- MB-210: Microsoft Dynamics 365 for Sales
- MB-200: Microsoft Power Platform + Dynamics 365 Core
- Microsoft Certified: Dynamics 365 Sales Functional Consultant Associate
- MCTS: Microsoft Dynamics CRM 2011 Applications
- MCTS: Microsoft Dynamics CRM 2011 Customization and Configuration

Das Offshore, Mumbai	Jr. Engineer	Jan 13, 2009 – Oct 31, 2009

PROJECTS:

- **Elevance Health - SFDC to D365 Migration, USA**

Application involves complete transition of SFD Schema migration and Data migration from SFDC to D365 CE environments. Enhancing OOTB Sales functionality and marketing capability. From solutioning blueprint to defining schema migration strategy, data migration strategy, integration strategy and implementation & integration strategy for multiple phases of implementation. Application is integrated to 15+ external applications leveraging both real-time and batch processing.

- **Wipfli Dynamics 365 CRM Enhancements**

Enhancing dynamics CRM application from requirement gathering, design to implementing components to make sure it fits the business needs. Enhanced Sales Insights, Customer Service Insights, PSA, Sales and Marketing functionality. Implemented Azure DevOps CICD pipelines for continuous integrations and continuous releases. Sprint demo's to business owners and stakeholders after every sprint.

Development: D365 plugins and custom workflows development; Use of Microsoft Flow, Azure Logic Apps for third party integration; Use of Customer Voice for survey implementation; Configure Azure CICD pipelines for automated deployments; Form customization & JavaScript development for CRM UI configuration. Automated unit testing framework implementation using Microsoft Fakes.

- **FLSmith Dynamics 365 CRM Enhancements**

This project aims to revolutionize operations for by implementing Dynamics 365 CRM, leveraging its sales, marketing, and customer service modules. The implementation will include customization of lead and opportunity management workflows, integration with existing ERP systems for seamless data flow, and development of custom dashboards and reports for enhanced visibility. Additionally, the project will entail training for employees on utilizing the new CRM effectively. By harnessing the power of Dynamics 365 CRM's advanced analytics and reporting capabilities, the project will drive data-informed decision-making, ultimately increasing productivity, profitability, and overall customer satisfaction. This comprehensive technological transformation will solidify the company's position in the competitive manufacturing landscape.

- **Accenture Capability Team, Pre-Sales**

Involved primarily attending meetings with potential clients, onshore Avanade team to determine technical and business requirements and ensuring that all necessary key information is collected. Providing technical and functional solutions with agreed timeframes. Understand business drives and risks involved to the customer. Co-ordinating with industry people, architects, other leads involved in proposals. Pitching CRM solutions to fit the requirements with no-gaps.

Development: POC on Field Service, Project Service, Customer Voice, Virtual Agent for Presale deals. Power automates extensively used.

Large Deal size handled – 5 million USD

Small Deal size handled – 0.8 million USD

- **ResourceOne Security CRM Optimization, AON, USA**

Objective was to analyze and propose the improvements to ResourceOne security model in Microsoft Dynamics CRM 2016. Proposed recommendations for the current application areas: Optimize the usage of Business Unit; Optimize the usage of Teams, Optimize the Security Roles, Optimize the usage of Field Level Security Profiles; Optimize the usage of SolutionsConfigure CICD process to automate deployments; Restructure source code in TFS; Automated Unit Testing.

Development: D365 plugins and custom workflows development; Form customization; Security roles and business unit configurations; Solution management; Automated unit testing framework implementation using Microsoft Fakes; Data Import using Kingsway Soft; SharePoint integration for document data libraries.

- **First Time Home Buyers Initiative (FTHBI), CMHC, Canada**

The application is implemented in Dynamics 365 with integrated suite of native applications like SharePoint, Outlook, and Teams. The application allows many pre-existing items to be reused, like Interfaces to GSL, Loan objects, Cash Management. FTHBI program eligibility and allocation data implemented in D365. The MLI providers interface with the program through a Web service and scheduled batch file exchange.

Development: D365 plugins and custom workflows development; Use of Microsoft Flow, Azure Logic Apps for third party integration; CRM Form customization & JavaScript development for CRM UI configuration. Automated unit testing framework implementation using Microsoft Fakes.

- **Dynamics 365 Customer Service Integration, SpectrumSoft Tech, Singapore**

This project is implemented in Microsoft Dynamics 365. Main objective of the implementation is to customize the customer service application with the associated serial numbers and customers integrating from outside application. Serials will be fetched from third party vendors and cases to resolved based on statuses received from third party. Major role involved with this application from requirement gathering, designing to solutioning, creating functional and technical specifications, and customization & development. Also implementing Microsoft Azure Logic Apps for various connectors in Dynamics 365.

Development: D365 plugins and custom workflows development; Use of Microsoft Flow, Azure Logic Apps for third party integration; CRM Form customization & JavaScript development for CRM UI configuration. Automated unit testing framework implementation using Microsoft Fakes. Use of Dynamics connectors.

- **Knowledge Networks CRM Implementation, GFK, USA**

This project is up gradation from CRM 2011 to CRM 2016 and up gradation from CCA to USD. Project was majorly implemented in various modules like managing repository, maintaining goods and services, implementing surveys. Up gradation involves writing functional and technical specifications, FRD's and TDD's needs to be maintain throughout the phases. It is a call center project consisting of three different modules viz. Call center, Fulfilment and Inventory. Call center module used by call center agents to maintain the data of members.

Fulfilment and Inventory are interrelated to each other, fulfilment used to create orders and tracking products and inventory to maintain product stock.

Development: CRM plugins and custom workflows development; Use of Microsoft Flow, Azure Logic Apps for third party integration; CRM Form customization & JavaScript development for CRM UI configuration. Automated unit testing framework implementation using Microsoft Fakes. Upgrade on-premise CRM 2011 to CRM 2015. ADX portal integration with CRM 2015.

- **SSFA CRM Implementation, Super State Financial Australia (SSFA), Australia**

This project is implemented in MS CRM 2013. SharePoint is implemented with CRM for document management. Project scope includes sales and marketing module, document management across the business. The project is implemented FOM (Future Operating Model) to transform the business and enable the delivery of a new way engaging and transacting business with customers.

Worked in Sydney (Australia) on 457 work-permit visa since 10th Nov, 2014 – 23rd Dec, 2014

- **IBA Enterprise CRM Implementation, Indigenous Business Australia (IBA), Australia**

This project is implemented in MS CRM 2011. Business support, Workshop and Investment modules implemented in scope. All the three modules are tightly integrated with each other. Business support module defines support to customers to build their own business in various industries. This business can be for individual as well as for smaller to mid organizations.

Workshop module defines the setting up workshop into different locations and allowing customers to participate into workshops. Investment module defines various investment methodologies for the customers depending on workshops present in various location.

Development: CRM plugins and custom workflows development; CRM 2011 Form customization & JavaScript development for CRM UI configuration.

- **Citymove CRM Implementation, Citymove, Australia**

This project is implemented in MS CRM 2011. Citymove solution was developed after keeping in mind the extendable needs of Citymove organization, with multi-tenancy approach. The Citymove website developed in Sitefinity CMS served as client facing for the CRM. Also, several CRM web services API was used for creating a secure channel of communication between the client facing website and CRM. The main of the website is to manage local and interstate moves depending on two different postcodes involves. As the move progress leads are processed in CRM followed by opportunities, quotes and orders.

Development: D365 plugins and custom workflows development; CRM 2011 Form customization & JavaScript development for CRM UI configuration. Upgrade on-premise CRM 4.0 to CRM 2011.

Production Deployment and post go live support in Australia on business visa in Oct-Nov 2011.

EDUCATION

- 2008 - M.Sc. (Information Technology), Mumbai University, India
- 2006 - B.Sc. (Information Technology), Mumbai University, India
- 2003 - HSC, Mumbai University, India
- 2001 - SSC, Mumbai University, India
