Objective

A dedicated and proficient .NET developer with relative experience in C# programming, ASP.NET Core, Web API, MVC and Entity Framework Core. Adept at Python programming and skilled in cloud technologies including Azure Function App, Logic App, Blob Storage, and Azure Table. Experienced with MS SQL, MySQL and PostgreSQL databases. Committed to utilizing Azure DevOps, Git repositories and Visual Studio to deliver high-quality, scalable solutions. Seeking to contribute to a forward-thinking team where I can apply my expertise to drive the success of innovative projects.

Work Experience

- **Acumant Technologies Pvt Ltd** Feb - 2024 - Present
Software Engineer - II

Project : Stricct Integration (Amadeus)

Technologies used : Asp.net core , Azure Function App, Blob Storage, Dynamic 365 Business Central

Roles & Responsibilities:

- **Creating Blob Storage Configuration:** Setting up Azure Blob Storage to detect and store uploaded air ticket booking files.
- **Developing Trigger Function:** Creating an Azure Function App that automatically triggers when a file is uploaded to the Blob container.
- **Retrieving Files:** Retrieving the uploaded file from the Blob container upon trigger activation.
- **Extracting Booking Details:** Processing the retrieved file to extract the booking details.
- **Saving Data:** Storing the extracted booking details in D365 Business Central
- **Ensuring Security and Compliance:** Applying security standards and regulations to all data handling processes.

Project : Orkla Integration (Prestashop)

Technologies used : Azure Logic App, Blob Storage, Dynamic 365 FnO

Roles & Responsibilities:

- **Configuring Logic Apps:** Set up Logic Apps within the integration system to handle the incoming XML booking files.
- **Confirming Sales Orders:** Use Logic Apps to confirm the sales order based on the information in the XML booking file.
- **Converting XML to JSON:** Implement functionality in Logic Apps to convert the received XML booking file into JSON format
- **Storing Confirmed Sales Order Details:** Store the confirmed sales order details in D365 Finance and Operations (D365 FnO).

Project : Sales X Fortnox Integration

Technologies used : Asp.net core , Azure Function App, Azure Table , Dynamic 365 Sales

Roles & Responsibilities:

- **Integration Development:** Developed and maintained an automated integration between Dynamics 365 Sales and Fortnox for seamless invoice creation and updates.
- **Plugin Design:** Designed and implemented a Dynamics 365 plugin to trigger an HTTP-based Azure Function when invoices are marked as "Ready to Transfer."
- **Azure Function Implementation:** Created the HandleNewInvoice Azure Function to retrieve relevant invoice details (products, pricing, etc.) from Dynamics 365 and map them to the Fortnox API.
- **Data Synchronization:** Ensured accurate data flow and synchronization between Dynamics 365

and Fortnox, including the transfer of product details, price lists, and real-time payment status updates.

- **Performance Optimization:** Monitored and optimized the integration system for performance, error handling, and data integrity during invoice transfer and synchronization.

Project : Ecoprism

Technologies used : Asp.net core , Azure Function App, Blob Storage, Azure Table

Roles & Responsibilities:

- **Setting Up Data Connectors:** Configure various connectors, including Excel, API, Azure Table, and others, for users to upload resource usage data.
- **Implementing Data Upload Mechanisms:** Develop functionality to allow users to upload resource usage data through the configured connectors seamlessly.
- **Designing Data Storage:** Set up a database or storage solution to securely store the uploaded resource usage data.
- **Tracking Resource Usage:** Implement logic to monitor and track the usage of renewable and non-renewable resources within the system.
- **Providing Recommendations:** Develop logic to analyze resource usage and provide recommendations on optimal amounts for both renewable and non-renewable resources.
- **Ensuring Data Integrity:** Establish validation checks to ensure the accuracy and consistency of uploaded data.

• **Infosys Limited**

Nov - 2021 - Feb - 2024

Systems Engineer

Project : ERP Agnostic System(MARS)

Technologies used : Asp.net core, Web API ,Microsoft Azure , MSSQL DB

Roles & Responsibilities:

- **Setting Up Warehouse Data Integration:** Configure the system to accept and process data files sent by different warehouses.
- **Designing Data Extraction Mechanism:** Develop functionality to extract data from various file formats provided by the warehouses.
- **Storing Extracted Data:** Implement a robust database solution to store the extracted data securely.
- **Tracking and Tracing Items:** Enable functionality to track and trace food items through all phases of supply, manufacturing, and distribution.
- **Ensuring Data Accuracy:** Establish validation checks to ensure the accuracy and consistency of the data extracted from warehouse files.

Technical Skills

- C# programming, Asp.net core , Web API ,MVC , Entity Framework core, Python programming
- Azure Web App, Azure AD, Azure SQL Database, Azure Cosmos DB, Logic APP, Azure Function , Key Vault,Azure Monitor, Azure Storage
- MS Sql , My Sql , Postgre Sql
- Azure DevOps , Git Repository , Visual Studio

Education

- **East West College of Engineering** 2021
B.E
9.0 CGPA
- **Basaweshwara PU College** 2017
12th
86.83 %
- **Maurya Public School** 2015
10th
88.32 %

Certifications

- Microsoft certified Azure Developer Associate (AZ-204).
- Microsoft certified Azure Fundamentals(AZ-900).
- Infosys certified ASP.NET Core MVC Developer
- Infosys certified ASP.NET Core Web API.
- Infosys certified Entity Framework Core.
- Infosys certified CSharp Programmer
- Infosys certified Python Programmer.
- Microsoft certified Azure AI Fundamentals (AI-900).
