Summary

Chinedu is a trained statistician and a certified database administrator and enterprise resource planning expert with over eight years experience in core I.T Support in enterprise environments and a blend of customer service spanning through the finance, production and technology industries.

A passionate and purpose driven support engineer with a flair for a proper implementation of a unique technology infrastructure in the work place. An explorer of Innovative ideas for a positive change.

My specialties include but are not limited to: Enterprise Application Support, Networking, User-client support, IT reporting, System troubleshooting and Hardware maintenances, Network monitoring, Windows installation/ Software configuration, Server backup, Database administration etc.

Experience

Subject Matter Expert | Dynamics 365 F&O

Tek Experts

May 2022 - Present (1 month +)

As an SME, I was responsible for the technical advancement of the staff and identifying opportunities for product improvement. In this role, I also served as advisor to the dynamics team for technical questions and problems, guiding and partnering with the team members to solve complex issues. I was also involved in coaching, mentoring, and training the dynamics team to increase their technical knowledge, and to take the lead on cases with high business impact

Responsibilities:

- Serve as the primary point of escalation in cases with severe business impact (i.e., revenue or financial) for large or demanding customer accounts.
- Solve technical problems for multiple topics and processes, developing new methodologies for resolution as needed.
- Deliver an excellent customer experience through timely and accurate case resolutions.
- Identify challenges and knowledge gaps on the team, collaborating with stakeholders and colleagues to address issues.
- Work with client representatives to understand, document, and implement tools and processes for the team.
- Collaborate on cross-team and cross-product technical escalations to resolve customer issues quickly.
- Develop and deliver training material to ensure continuous improvement of the team's technical knowledge and customer satisfaction among internal and external stakeholders.
- Participate in the hiring process by verifying candidate technical knowledge and experience.

Technical Lead | Dynamics 365 ERP F&O

Tek Experts

Oct 2020 - May 2022 (1 year 8 months)

As a Tech Lead, I supervise a team of over 15 to 40 engineers and we remotely support international and professional/premier clients across the North America/Asia regions and provide customer satisfaction in the use of Dynamics 365 ERP F&O enterprise solution via Lifecycle services and the unified interface. This includes advisory services, technical support, on-boarding implementation, updates and cloud deployments.

Responsibilities:

- Provide technical support to D365 ERP Engineers in operation
- Provide technical training and coach new support engineers
- Manage long term relationships with dynamics 365 customers/partners and provide approved Microsoft documentation to guide troubleshooting issues
- Review support tickets raised by North-America/APAC and Premier/Professional customers, received by support engineers, and provide next action plan to assist with a resolution or a workaround
- Handle escalations and engage in remote sessions and calls with customers to ask technical questions, gather relevant information, recommend or try out some mitigation steps
- Engage in weekly/monthly meetings with Subject Matter Experts, Partner Technical Advisors and Managers to discuss blockers on incident management tracker, DSAT cases, and other improvement plans
- Collaborate with development teams, Microsoft FTEs, and members from other lines of business (Azure, CRM, Office 365, Business Central, D365 Finance) and regions on cases outside technical scope or with cross integrations
- Ensure case SLAs are met in a timely manner according to case severity
- Ensure internal quality and technical processes are adequately followed when delivering technical support to customers
- Research docs, TSGs, resources for workarounds, solutions to described problems or hotfixes for work item/bugs and explanations to by-design limitations on the product application

Technical Support Engineer | Dynamics 365 ERP F&O

Tek Experts

Nov 2019 - Sep 2020 (11 months)

Responsibilities:

Dynamics 365 ERP Backend Support on LCS, Document routing agent, Batch process, Package/ Environment deployment, AX/D365 Installation and configuration setup, Service and Account Advisory, Project Implementation, Updates and upgrades etc.

Technical Support Engineer | Dynamics 365 CRM/CE

Tek Experts

Oct 2018 - Nov 2019 (1 year 2 months)

□ IT Business Process Outsourcing

Responsibilities:

- Identify technical issues, investigate root causes and recommend solution to enterprise problems - applying diagnostic techniques as necessary and notifying the customer.
- Perform case management functions and keep cases up to date and accurate.

- Provide first contact quality response and or resolution while meeting the service level agreement within the specified time frame.
- Review, research, escalate and provide solution to technical support service request on dynamics 365 customer engagement and Office 365.
- Internal collaboration and escalation to the product team or senior engineers via incident management.
- Run tested and approved scripts on the customer's support, production instance and communicate with customers, clients and partners based in EMEA regions.

Achievements:

- Best Performing Technical Lead for Microsoft Dynamics ERP (NOAM) 2022.
- Nominated a five star hero for the best customer verbatim for July 2019.
- Nominated to kick start a new business line in Nigeria - Dynamics 365 Finance and Operations (Life Cycle Services).
